

Brown

Surname Summary Report

Prepared by *Genealogy Today*
25/Oct/2006

Overview

The surname BROWN is listed as the 5th most common based on statistics from the 1990 census published by the U.S. Census Bureau. For such a common surname, we recommend purchasing one of our premium reports that allow you to narrow the search scope by geography (state/county) and time (year range).

Surname Research Report

<http://reports.genealogytoday.com/surname-report.html>

Ancestor Scout Report

<http://reports.genealogytoday.com/ancestor-report.html>

This report will highlight resources that offer the greatest number of search results for the BROWN surname. Revisions to this report will be made periodically as additional online information is discovered that may be relevant.

You are permitted to share this report with anyone, but we ask you not to post it on any web site, nor violate any mailing list rules that do not permit commercial postings.

Published Family Trees

The three most common methods of publishing family trees include: online using GEDcom publishing tools, online in a shared environment using one of several services, and the most traditional being in print.

We always recommend checking for existing research as a first step. Many researchers "reinvent the wheel" when someone may already have tackled certain branches of your tree. As with any compiled genealogy, we remind you of the importance to verify the sources used before assimilating any of the information into your own project.

Here are the results for the BROWN surname.

Census Records

The U.S. Federal Census is one of the most popular resources for genealogists. Access to the actual census provides information about family members residing in the same home, and even lets you see who the neighbors were.

Currently, the census data for the years 1790 to 1930 have been made public. Census data is released 72 years after it is taken for privacy reasons. The 1940 census data will be available in 2012.

The results below were obtained from Ancestry.com, the only company currently offering indexed, searchable access to all census years.

Here are the results for the BROWN surname.

Census Year	Results
1930 US Federal Census	681074
1920 US Federal Census	640943
1910 US Federal Census	578874
1900 US Federal Census	482882
1880 US Federal Census	355283
1870 US Federal Census	287300
1860 US Federal Census	183013
1850 US Federal Census	141269
1840 US Federal Census	19150
1830 US Federal Census	13712
1820 US Federal Census	9147
1810 US Federal Census	6110
1800 US Federal Census	4036
1790 US Federal Census	3084
1890 US Federal Census Fragment	34

Birth Records

Birth certificates are the result of relatively modern legislated vital registration. They provide the essential elements researchers look for in a birth record: names of the child, father, and mother (sometimes with maiden name), place and date of birth.

Baptismal records can be also useful for ancestors whose denominations practiced infant baptism as the religious ceremony took place shortly after the child's birth, usually within a few weeks.

Aside from original certificates, these vital records appear in indexes published by individual states, annual town reports, and other research collections.

Church Membership

Some of the best vital records of our ancestors' lives can be found in church records. This is most significant during the age before state, county, and local governments began complying with legislation to issue birth and death certificates.

In addition to vital records, the membership records of churches can serve as a guide to the migration of your ancestors within this country. Regardless of their circumstances, most would register with the church upon arriving in a new town as they often travelled to find better opportunities.

Marriage Records

Marriage records often contain detailed information including places of birth and current residence, occupations, parents' names and birth places, and previous marriages of the bride and groom. Even something as basic as the couple's signatures can be invaluable in deciphering other handwritten documents.

Years ago, when a couple planned to marry, the prospective groom would take out a bond from the clerk with the county court of the bride's residence. These marriage bonds can be helpful in determining the approximate date of the marriage whenever marriage books and/or church records cannot be located.

Military Service

Just about every male on your family tree would have been a candidate for military service. During the American Revolution, men aged 16 to 60 were considered fit for service, and in certain periods of our history, enlistment was mandatory.

The 1930 census documents an individual's military service, stating whether the person was a veteran of the U.S. military or naval forces, and even listing wars or expeditions that they may have served in.

Frequently overlooked resources include Civil War Pension records and draft registration cards.

Death Records

Death records can be located in death indexes, funeral notices, obituaries in newspapers, cemetery records and even remembrance (or mass) cards. In addition, the Social Security Death index is a fantastic resource for more recent deaths.

Sources of death information that researchers don't often consider are the publications of clubs and societies. Many of these organizations kept careful records of their members' passings, even when they have relocated to other towns or states.

Here are the results for the BROWN surname.

Miscellaneous Resources

There are countless type of records that provide additional details about the lives of our ancestors, including their occupations, involvement in clubs and societies, donations they may have made, the types of vehicles they owned, personal disasters recorded by insurance claims, and even photographs from different stages of their lives.

Local city directories, old telephone books, Masonic lodge rosters, insurance company annual reports, state vehicle registration documents, mining reports, employment service records and government employment registers are just of the few resources that the **Family Tree Connection** project is actively transcribing.
